## Ouderkerkerlaan, Amstelveen

The house has been completely renovated in 2019. The 2nd floor has been added new to the house and has 2 new bathrooms.

This year, Rijkswaterstaat will start work on the widening of the A9. The municipality is investing 40 million euros in non-statutory measures, such as a sunken location, roofs and green noise barriers. The green appearance of Amstelveen is thus further enhanced. The view at the back of the house
